

Finntip Flex Tips

Our latest breakthrough in pipette tip technology is the innovative Finntip Flex system. Designed to meet the needs of today's pipette users, the Finntip Flex system consists of easy-to-use, soft, flexible high-end tips and a tip rack with space-saving refill kits. Finntip Flex tips are available in a range of volumes covering 0.1-10 µl tips to 1200 µl tips, as well as a 10 ml tip, and come as standard racked tips, sterile tips or filter tips.

Extra smooth tip surface

All Finntip Flex tips are molded with diamond polished tooling for an extra smooth tip surface and improved tip transparency. The smooth tip wall surface prevents liquid retention and helps to achieve better pipetting precision than non-polished tips. The increased precision is most beneficial with small volume

pipetting where precision values can be improved by approximately 50%.

All round flexibility

With their special thin wall molding, the soft tip of the Finntip Flex reduces the amount of force needed to attach and eject tips, significantly lowering the risk of RSI. It also ensures a better seal with the pipette module, for greater accuracy and precision.

Finntip Racks and Refills

Finntip Flex tips come in newly designed racks. These are easy to open with one hand and have a sturdy base and non-slip feet, allowing you to easily yet firmly attach the tip. In addition, the refill system saves space and allows fast tip matrix plate attachment with just one click. Ten refill plates are stacked compactly to reduce material use, eliminate waste and keep the plates free from dust.

For information on our full product range the Thermo Scientific Finnpiette and Finntip Catalog is available from your nearest representative and can also be downloaded from: www.thermo.com/finnpiette

NEW Finntip Flex 10

Cat. no.	Description	Quantity
94060100	Finntip Flex 10	10x96/rack
